Dr. Sarah Chen 2:34 PM

Research from 2024 shows that Cognitive Behavioral Therapy remains the gold standard for treating anxiety disorders. The evidence base is overwhelming - we're seeing 60-70% improvement rates in controlled studies.

Dr. James Williams 2:35 PM
Replying to Dr. Sarah...

While CBT is effective, we shouldn't ignore the mind-body connection. Mindfulness-based approaches and somatic therapies address the root causes, not just symptoms. Healing happens when we integrate all aspects of being.

Dr. Maria Rodriguez 2:36 PM

Both perspectives have merit. The key is personalization - some clients respond better to structured CBT,
